Oracle on Windows and .NET

Christian Shay, Product Manager, Windows and .NET

Karin Brandauer, Principal Support Engineer, Bug Diagnostics and Escalations

Agenda

- Oracle on Windows Intro
- Oracle on Windows and .NET – Today
 - Product Overview
 - Demo - Oracle Developer Tools for Visual Studio .NET
 - Oracle Enterprise Manager – Managing MS Products
- Oracle on Windows and .NET – 11g
 - New Features
- How to move to 11g on Windows
- Customers
- Q & A

Oracle on Windows

- Oracle is large part of the Windows installed base
- \$1.24B Oracle DB on Windows Revenue in 2005 (Gartner 2006)
- Most downloaded database OS on OTN
- .NET Products (ODAC) a top ten OTN download
- 406,000+ subscribers to Windows and .NET OTN newsletter

Commitment to Windows and .NET

- Oracle7 was the first database to ship on Windows in 1993
- First public DB developer's release for 64-bit Windows
- Supported both 32-bit and 64-bit Databases on the first day of Windows 2003 server release
- 32-bit Windows Server is a base development platform for Oracle; 64-bit Windows is a Porting platform within Server Technologies
- Focused Engineering and Product management groups for Windows-specific integration projects

Oracle Database on Windows

Vista

Microsoft Relationship

Engineering

Close collaboration with MS Engineering teams (OS, ADO.NET, VS.NET, VSS ..)
Access to Pre-release and Beta drops of Microsoft Products

Marketing

Oracle sponsors MS Events (TechEd Orlando 2007, Boston 2006, Barcelona 2007, VS Live 2006- US/Europe, PDC 2007/2005)
MS sponsors Oracle Events (OOW 2006 San Francisco, OOW 05 – SF, London, Shanghai)
VSIP Premier Partner

Support

MS Premier Support Agreement
Collaboration of support teams

Windows and .NET - Today

Windows 32-bit Platform Support

OS	9iR2	10gR1	10gR2
Windows 2000	Yes	Yes	Yes
Windows XP Professional	Yes	Yes	Yes
Windows Server 2003	Yes	Yes	Yes
Windows Vista	No	No	Yes*

*Special 10.2.0.3 release for Vista

Windows 64-bit Platform Support

OS	9iR2	10gR1	10gR2
Windows Server 2003 for Itanium (64-bit DB)	Yes	Yes	Yes
32-bit Windows XP & Windows Server 2003 on x64 (32-bit DB)	Yes	Yes	Yes
Windows XP & Windows Server 2003 x64 (32-bit DB)	Yes (client only)	Yes (client only)	Yes (client only)
Windows XP & Windows Server 2003 x64 (64-bit DB)		Developer Release (May 04)	Yes
Windows Vista x64			Planned: 2 nd Half CY 2007

Oracle Database 10g Express Edition (2006)

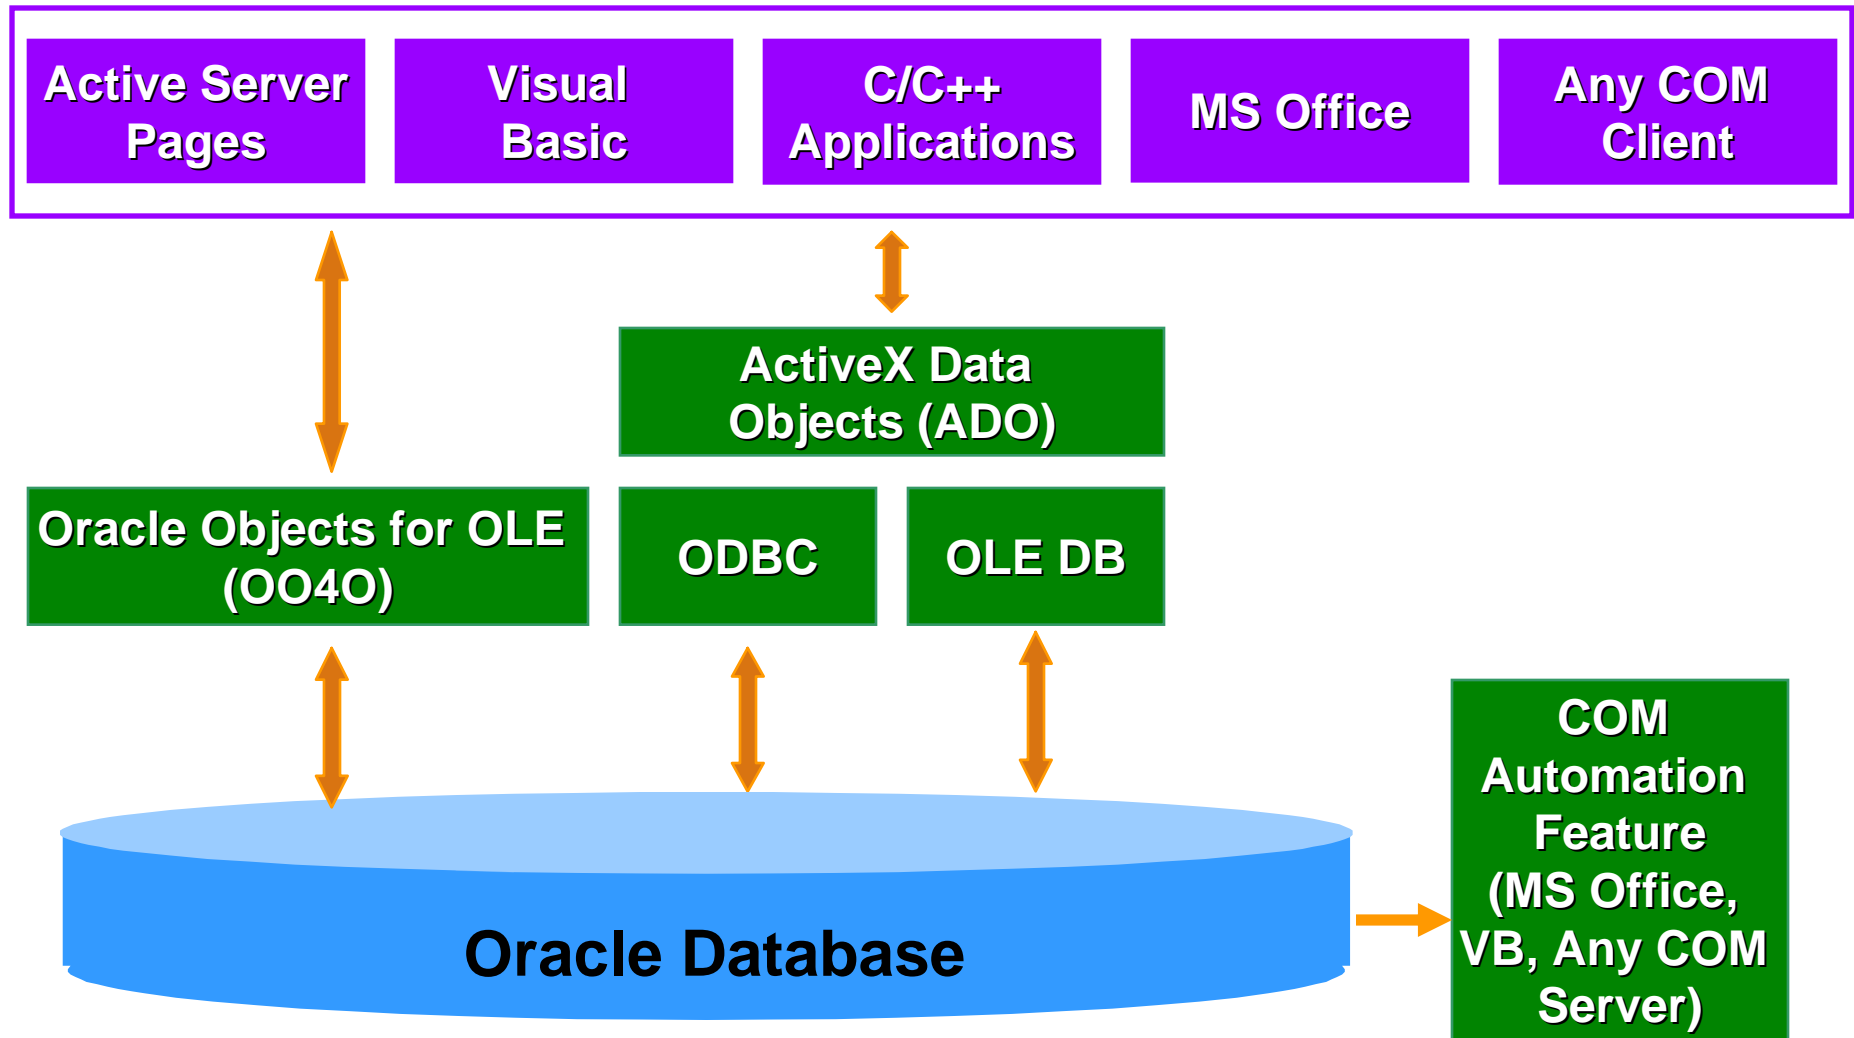

- Entry level small footprint database packaged with InstallShield
- Certified on Windows Vista
- Free to develop, deploy, and distribute
- Uses 1 CPU
- 4 GB of User Data
- Use up to 1 GB RAM
- Oracle Developer Tools for VS.NET (Express Edition version)
- Download from www.oracle.com/technology/xe

Oracle Database 10g: Enhanced Developer Productivity

- Optimized data access providers with full support for Oracle
- Server side development in .NET
- Integration with Development Tools (Visual Studio)

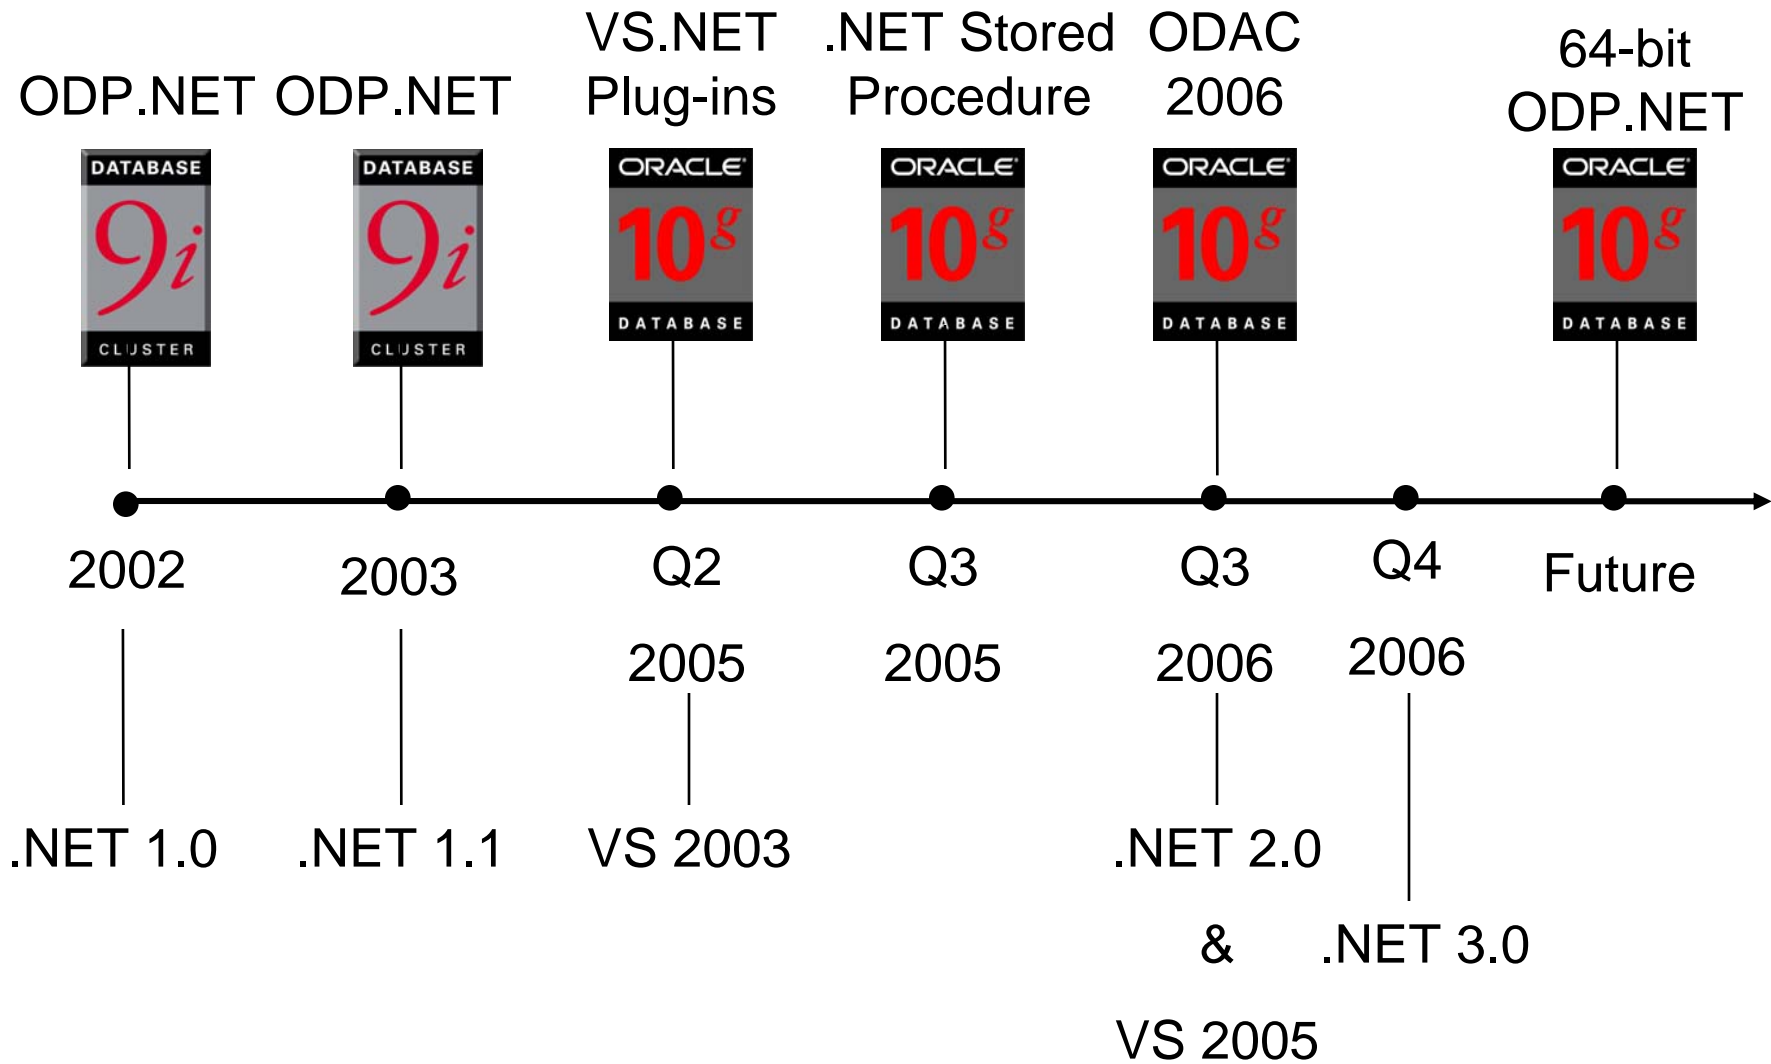

Windows COM Data Access

.NET Data Access

History of Commitment to .NET

Oracle Data Provider for .NET

- Free
- Easy to learn, even if new to Oracle
 - Compliant with ADO.NET 1.x and higher
 - No learning curve
- Complete access to .NET functionality
- Native access to Oracle 11g, 10g, 9i, 8i data
- Utilize advanced Oracle Database features
 - RAC, performance, security, data types, XML, etc.

Oracle Database Extensions for .NET (AKA .NET Stored Procedures)

- Write Microsoft Visual C# or Visual Basic .NET procedures/functions
- Oracle 10g Release 2 on Windows Database Option
- Build assembly in Visual Studio .NET
- Deploy from Visual Studio .NET into Oracle using .NET Deployment Wizard

Oracle Developer Tools for Visual Studio .NET

- Free
- “Add-in” for Visual Studio 2005 and VS .NET 2003
- Easy to use and intuitive
- Powerful features that enhance productivity
 - Table/view designers
 - Auto .NET code generation
 - PL/SQL editor/debugger
 - Much more
- Stay in Visual Studio for project lifecycle

ORACLE®

D E M O N S T R A T I O N

Integration with Visual Studio 2005

Oracle Enterprise Manager Managing Microsoft Products

Windows Host Management

- Proactively monitor Windows environments
- Analyze performance trends
- Manage many as one
- Ensure compliance through standardization
- Rich visualization and reporting
- Out-of-box Availability and Performance Monitoring
- Comprehensive Configuration management
- Powerful Administration Capabilities

Management Plug-Ins

Systematic way to extend system coverage

- Enable Grid Control to monitor and manage new components
- Microsoft plug-ins:
 - SQL Server
 - Active Directory
 - BizTalk Server 2004
 - Commerce Server 2002
 - .NET Framework
 - IIS
 - ISA Server 2004

Management Connector for Microsoft Operations Manager (MOM)

- Enables selective forwarding of MOM alerts to Enterprise Manager
 - Automatic and manual alert forwarding
- Enterprise Manager is automatically updated when changes in MOM occur
- Flexible modeling options inside Enterprise Manager:
 - Generic MOM Managed Host target
 - Map MOM computers to individual targets in EM

Windows and .NET – 11g

11g Windows Vista Support

- 32-bit support
- 64-bit support (for x64 systems)

Oracle DB 11g - Oracle VSS Writer

- Oracle VSS writer is transparently integrated with Volume Shadow Copy Service (VSS)
 - Most of the writer functionality usable by any requestor
 - Oracle writer is installed automatically with Oracle RDBMS on windows
 - Automatic online point-in-time copy of Oracle database using VSS requestor
- Simple backup and recovery procedure
- Offload backup and reporting to another server using transportable snapshots

.NET New Feature Themes

- Performance
 - Expose new tuning features
 - Improve performance out of the box
- Manageability
 - Deployment: smaller client and easier packaging
- Ease of Development
 - Integration with Visual Studio 2005
 - Features to improve developer productivity
- Security
- Grid Computing

Oracle on .NET Release Plan

- Release vehicles (in chronological order)
 - ODP.NET 10.2.0.3 Patch
 - New ODP.NET features
 - Oracle Database 11g
 - New ODP.NET features
 - ODAC 2007
 - New ODT and ODP.NET features

ODP.NET - Performance

- ODP.NET and Oracle improvements (11g)
 - Improved statement caching
 - Cache ODP.NET parameter contexts
 - Better LOB performance
 - LOB prefetching – fewer roundtrips
 - Client Query Cache
 - Caches results sets either on client or server
 - Accessible across the same process to different users
 - Cache remains consistent via DB Change Notification

ODP.NET - Performance

- ADO.NET 2.0 Bulk Copy (ODAC 2007)
 - Direct data upload from .NET to Oracle
 - Excellent for large amounts of external data
 - Performance comparable to SQL*Loader
 - Benefit: Load external data quickly into Oracle database with an easy to use API

ODP.NET Manageability – Simpler Deployment

- Instant Client (ODAC 2007)
 - Easier to package
 - Use Xcopy method for large scale deployments
 - Use OUI for small deployments
 - Smaller footprint
 - Instant Client (Xcopy)
 - Instant Client (OUI)
 - Faster to deploy
 - Xcopy
 - Exact same ODP.NET functionality

Ease of Development - ODT

- Native integration with VS 2005
 - “Data Sources” Window - automatic code generation
 - Server Explorer Integration
 - VS Wizards, Designers and Tools (eg Query Designer)
- Source control integration
 - Source Safe, Team System, Subversion, etc
 - Check in files from Oracle Database Project
- SQL Script editor and execution engine
 - Edit and run SQL and PL/SQL scripts
 - Keyword coloring, Integrated online help

Ease of Development - ODT

- ASP.NET (web) development support
 - Data Sources Window – code generation
- Tuning and Profiling
 - Explain Plan
- Query Builder

ODP.NET – Ease of Development

- System.Transactions (10.2.0.3)
 - Support for local transactions
 - Set by developer in Windows Registry or connection string
 - Download ODP.NET 10.2.0.3.02 patch from Metalink
 - Not available as part of the 10.2.0.3 DB patchset
 - Benefit: local transactions in System.Transactions
 - Not promotable to distributed transactions (yet)

ODP.NET – Ease of Development

- Change Notification – Query-based (11g)
 - Finer granularity
 - Distinguishes whether row changed would change client query results
 - Benefit: more accurate notifications
 - Requires Oracle Database 11g server

ODP.NET – Ease of Development

- User-Defined Types aka ADTs (ODAC 2007)
 - Map .NET custom objects to
 - Collections (Varrays and Nested Tables)
 - Objects
 - ODP.NET OracleRef can represent Oracle REF
 - Optimum for Spatial and other object applications
 - Oracle Developer Tools for Visual Studio .NET
 - Create, view, and modify ADTs and their specifications
 - Automatically generate .NET custom type from existing Oracle Collections and Objects
 - Benefit: Improved productivity with Oracle ADTs
- ODP.NET Performance Counters (ODAC 2007)
 - Real-time monitoring of connections and connection pool

ASP.NET – Ease of Development

- ASP.NET Providers (ODAC 2007)
 - Pre-built services to store website state into databases
 - Cache Dependency Provider
 - Membership Provider
 - Profile Provider
 - Role Provider
 - Site Map Provider
 - Session State Provider
 - Web Parts Personalization Provider
 - Web Events Provider
 - Low learning curve
 - Based on standard ASP.NET provider APIs and schema

ODP.NET – Security

- Windows-authenticated connection pooling (ODAC 2007)
 - Each Windows user can have its own pool
 - Identified via their Windows domain/username
 - Set “User Id=/
”
 - Benefit: Better performance

ODP.NET – Grid Computing

- Fast Connection Failover enhancement (ODAC 2007)
 - Faster failover for severed connections
 - No waiting for a TCP/IP timeout
- Benefit: Connections are cleaned up much faster
- Works with RAC, Data Guard, and single instance
- Works with 11g and 10.2 DB server

ODP.NET – Grid Computing

- HA DB Down event (ODAC 2007)
 - Frees all pooled connections to the downed DB
 - ODP.NET now can receive DB down event
 - Set through HA Events = true in connection string
 - Events for service, service member, node, and database down
- Benefit: Failover to surviving Data Guard instance
- Works with Data Guard
- Works with 11g and 10.2 DB server

How to Move to 11g on Windows?

- Interoperability
 - Existing application with 11g
 - New 11g client application, older version of Oracle
- Migration
 - In many cases, no rebuild of application needed
- Compatibility
 - Existing applications can be used without any changes

Oracle on Windows Customers

- Thompson Financial
- Lipper
- One Source
- Giant Eagle
- Kroll Factual Data
- WeightWatchers.com
- TRW Safety Systems
- Ohio Savings Bank
- Schlumberger
- New York State Insurance Fund
- SAIC
- US Army Medical Research & Material Command
- First Command Financial Planning
- Tripos
- New Mexico State Highway and Transportation Department

.NET Customers

“We’re taking the best of both worlds – .NET and Oracle – to give us the best platform possible. ODP.NET is vital to the success of our next-generation application

”

Bill Evjen,
Technical Architect

“Since we use a Microsoft .NET middle tier, Oracle Data Provider for .NET provided the high throughput, high performance, and bulletproof connectivity to the database

”

Jim Lombardi,
Principal Database Engineer

“Integrating ODP.NET was easy and straightforward.. we were able to take advantage of... the power and high availability of the grid

”

Jason Lin, Assistant Vice
President, Application
Integration and Architecture
